Higher educational institutions admitted 100 students without examinations. These were students who had finished secondary school with a gold or silver medal, as well as veterans of World War II who had completed a secondary school education with distinction.

This year, considerably more interest has been shown by young people in the study of Russian language and literature. This is confirmed by the large number of applications received in the Tbilisi Pedagogical Institute imeni Pushkin, which prepares mainly teachers of Russian language and literature for Georgian schools. Last year there was no competition in this institute.

There are also many who wish to study in the faculty of physical education and sport. Until now only the Gori and Batumi pedagogical institutes had this faculty. This year a faculty of physical education and sport will be opened at the Sukhumi Pedagogical Institute imeni Beriia.

The majority of examinees at the Tbilisi Pedagogical Institute of Foreign Languages successfully passed the tests in German, English, and Georgian, as well as in history and other subjects.
